Projx design and build solutions

PROJX provides design and construction services based on the customers' objectives, strategies, and goals. Whether for a place of work or home, PROJX discusses how the project and space will be designed and how each element adds to the overall effect. Our team of architects and interior and landscape designers can help you get the most out of your space or property while making it beautiful.

We tackle all projects with the mindset that design is the solution. PROJX is the one of the leading company for build and design construction in Kuwait .

PROJX consultancy provides homeowners with an in-depth discovery and recommendation approach to determine how best to design their spaces. As one of the best build and design construction in Kuwait, we ensure that the design also conforms to the users' behaviors while meeting their parameters and budget.

Interior Design

Quality interior architecture.

PROJX helps homeowners and property developers design ideal spaces for living, whether it is a villa, apartment, room, or unit in a residential building. Our team adds significant value to the design, building, and renovation stages.

With every project, the team first aims to understand everything they can about the occupants—who they are, how many there are, what an average day looks like for them, and how they interact with other residents.

PROJX brings out the desired theme in the design, taking into account multiple factors such as the mechanical, electrical, and plumbing systems as well as the costs in the construction and maintenance long term.
